

Do you have multiple box spaces and auction room seats and would you like to have an internet network to connect them? Then choose an MPN-VLan via the Market Place Network (MPN).

MPN-VLan, your interconnected network

With MPN-VLan you can interconnect multiple box spaces, auction room seats and office spaces, spread across several Royal FloraHolland locations, to form a private secure network of whatever capacity you wish.

No connections via third-party entities, no disruptions due to outside influences. With just one supplier, Royal FloraHolland, that perfectly understands your needs, and with the support of Royal FloraHolland staff directly at hand. A private secure network via MPN offers even more advantages, as it only requires a single internet connection at a single location. That's the only place where you will need internet security..

What does it cost?

You need a subscription for each connection.

A standard 5 Mb MPN-VLan subscription costs

€ 54.20 a month. A capacity expansion costs € 10.84 per Mb a month. There are also connection costs.

What are the MPN connection costs?

A glass fibre connection (including network equipment) costs € 1355.

If a glass fibre connection is already in place, then the costs for the network equipment come to € 596. If both are present, then the connection fee is € 161.

Do you have a location with at most 4 workstations or a remote location (e.g. a loading dock), is there a telephone line and does 5MB (max.) satisfy your needs? Then we can offer you a MPN-VLan Lite connection, with a one-off connection fee of € 252 including the connection and equipment. We can optionally install a telephone line for the purpose, at one-off costs of € 504

Interested?

Are you interested in MPN or one of the MPN services? Or do you wish to have more information about internet via MPN?
