

EKT via Market Place Network (MPN)

Vital to the buying and auction process

MPN-EKT: the new service to receive EKTs via the Market Place Network Royal FloraHolland

Especially for EKT

It is essential to receive the Electronic Clock Transactions (**EKT**) quickly, safely and reliably. With its new service – Market Place Network EKT – Royal FloraHolland has the right solution

No disruptions thanks to the secure link

Do you ever worry about electronic threats? Viruses, DDoS-attacks or email harassment? None of this is possible with **MPN-EKT**, as it is a secure link that doesn't use the internet – your own private digital highway!

But **MPN-EKT** offers more, as all internal MPN connections are duplicated. If a disruption occurs, all connected customers are automatically switched to a redundant connection.

Other mail traffic from Royal FloraHolland, such as the electronic invoice and order processing by Connect, uses this connection.

The new **MPN-EKT** service is highly reliable, fast, and free of disruptions

Who is it for?

For buyers with a box or office space within Royal FloraHolland premises who have a mail server in their own box.

What do you need?

A separate glass fibre connection to the Market Place Network. If you use MPN-KOA, then you already have this connection. You also need your own mail server with free IP-addresses.

What does it cost

Subscription	€ 69,00 per month
One-off installation/connection costs in the box	
• Glass fibre and network equipment is present	€ 160,80
• Glass fibre is present in the box	€ 596,15
• No glass fibre or network equipment is present	€ 1.354,88
